CLAIM SET AS AMENDED

Claim 1 (Currently Amended) A device installation apparatus for a mobile body comprising:

an installing means, which is provided in a position sandwiched between a driver's

seat and an assistant driver's seat, and is able to dispose therein a desired device

including associated operating means for said device; and

a guide means for movably guiding said installing means along the longitudinal

direction of the mobile body;

wherein said installing means and said guide means are disposed on a floor portion

of the mobile body.

Claim 2 (Original) The device installation apparatus as claimed in claim 1, wherein said

guide means comprises a plurality of engaging portions for engaging said installing means

at a plurality of the predetermined different positions, and wherein, when said installing

means is moved based on guiding by said guide means, said installing means being

engaged with any one of said plurality of engaging portions.

Claim 3 (Original) The device installation apparatus as claimed in claim 2, wherein said

engaging portions are provided in said guide means such that the engaging portions

correspond to positions of seats disposed in the mobile body.

Claim 4 (Previously Presented) A device installation apparatus for a mobile body

comprising:

an installing means, which is provided in a position sandwiched between a driver's

seat and an assistant driver's seat, and is able to dispose therein a desired device; and

a guide means for movably guiding said installing means along the longitudinal

direction of the mobile body;

wherein said installing means comprises a mounting/dismounting means for holding

an installed device in a detachable manner and the device is replaceable by another one.

Claim 5 (Original) The device installation apparatus as claimed in claim 4, wherein said

installing means comprises a plurality of mounting/dismounting means, enabling a plurality

of devices to be replaced independently by other devices.

Claim 6 (Original) The device installation apparatus as claimed in claim 4, wherein said

installing means has a space therein for housing a device, and wherein said

mounting/dismounting means is provided in an internal portion thereof.

Claim 7 (Original) The device installation apparatus as claimed in claim 1, further

comprising a user judging means for judging whether a user of said apparatus is an

appropriate user or not, only when said user judging means has judged the user to be the

appropriate user, the operation of the device installed inside said installing means being

permitted.

Claim 8 (Original) The device installation apparatus as claimed in claim 4, further

comprising a user judging means for judging whether a user of said apparatus is an

appropriate user or not, only when said user judging means has judged the user to be the

appropriate user, dismounting of a device mounted on said mounting/dismounting means

being permitted.

Claim 9 (Previously Presented) The device installation apparatus as claimed in claim 8,

wherein said user judging means makes at least one of a judgment as to whether the user

is an appropriate user by verifying a fingerprint of the user, or by a voice of the user.

Claim 10 (Currently Amended) A device installation apparatus for a mobile body

comprising:

an installing means, which is provided in a position sandwiched between a driver's

seat and an assistant driver's seat, and is able to dispose therein a desired device; and

a guide means for movably guiding said installing means along the longitudinal

direction of the mobile body;

wherein said installing means and said quide means are disposed on a floor portion

of the mobile body; and

wherein a device to be installed inside said installing means is at least one of an

audio device for outputting audible information and an image reproducing device for

outputting visual information.

Claim 11 (Original) The device installation apparatus as claimed in claim 10 wherein said

installing means comprises a displaying means for displaying visual information to be

outputted by said image reproducing device.

Claim 12 (Previously Presented) A device installation apparatus for a mobile body

comprising:

an installing means, which is provided in a position sandwiched between a driver's

seat and an assistant driver's seat, and is able to dispose therein a desired device; and

a guide means for movably guiding said installing means along the longitudinal

direction of the mobile body;

wherein said installing means and said guide means are disposed on a floor portion

of the mobile body.

Claim 13 (Canceled)

Claim 14 (Previously Presented) A device installation apparatus for a mobile body

comprising:

an installing means, which is provided in a position sandwiched between a driver's

seat and an assistant driver's seat, and is able to dispose therein a desired device;

a guide means for movably guiding said installing means along the longitudinal

direction of the mobile body; and

a control means for moving said installing means, when a power source is turned off

after said installing means is moved, so as to return said installing means to the

predetermined position.

Claim 15 (Original) The device installation apparatus as claimed in claim 14, wherein said

predetermined position is a position sandwiched between the driver's seat and the

assistant driver's seat of the mobile body.

Claim 16 (Currently Amended) A device installation apparatus for a mobile body

comprising:

a console box that is provided in a position sandwiched between a plurality of seats

within the mobile body, wherein the console box installs at least one desired device

including associated operating means for said device; and

a guide rail to engage the console box in the mobile body, such that the console box

moves in a longitudinal direction within the mobile body along the guide rail; and

wherein said console box and said guide means are disposed on a floor portion of

the mobile body.
